Hi,
      Calendar Week 42: Here is test result summary for Linaro Android platform on following boards:

1) ARM Versatile Express A9
2) ST-Ericsson Snowball
3) TI Panda Board 4430
4) TI Panda Board 4460
5) Samsung Origen

Synopsis - Android version for all the boards mentioned above has changed to 4.1.2. Glmark2 and wifi/BT still not working on panda. On other boards Vexpress-a9, Origen and Snowball no major differences are observed compared to the last week testing. For more detail test results, please check the last column of the spreadsheet provided above.

1) **ARM Versatile Express A9** - https://docs.google.com/a/linaro.org/spreadsheet/ccc?key=0AkxwyUNxNaAadExQdHNxTnR5SFZCQzJnN1ZtQ2ZhWkE#gid=5

                              Features like glmark2, youtube, speech recorder, email, calendar and people still dont work. Test results are similar to last week.

2) **ST-Ericsson Snowball**   - https://docs.google.com/a/linaro.org/spreadsheet/ccc?key=0AkxwyUNxNaAadEF1NXVhT3dQWnZsTHBydnpiWVB4Umc#gid=5

                              This week test result is similar as week 41. WiFi,BT,youtube still not working. SD card still not getting detected blocking few other test cases.

3) **TI Panda Board 4430**   - https://docs.google.com/a/linaro.org/spreadsheet/ccc?key=0AkxwyUNxNaAadGVWd3pZazdaRUU0MnRnWmgwbVhTR0E#gid=17

                              Phone app still missing on panda. SD card is still an issue which blocks few test cases. Hardware graphics acceleration works fine.

4) **TI Panda Board 4460**   - https://docs.google.com/a/linaro.org/spreadsheet/ccc?key=0AkxwyUNxNaAadGVWd3pZazdaRUU0MnRnWmgwbVhTR0E#gid=18

                              Same comment as Panda 4430.

5) **Samsung Origen**   - https://docs.google.com/a/linaro.org/spreadsheet/ccc?key=0AkxwyUNxNaAadDRDVl9TSHUweUk3eG9ndk9sNGxUVnc#gid=5

                              All features remain the same status as previous week, except the tool chain version has been switched to the 12.10. Ethernet adapter can   only work after a command line based manually setting, and due to WiFi is unavailable, this is the only way we let the board be online. Google Apps can only work on "local" mode, Device Tree, Video playback and HDMI display are still unavailable.

Note: Calendar week 41 result attached for reference.

Thanks,
Amit khare <amit.khare@linaro.org>
